Subject: Re: Request for editorial decision for manuscript number 2014_BJAST_15372

I was able to access and read through the revised manuscript number 2014_BJAST_15372 as well as those comments from the peer reviewers, Except for one reviewer all the recommendations have been considered and accordingly addressed. The mentioned reviewer underlines that the article is very long and needs to be shortened. During reading on the other hand, i found that the presented results and discussion in the present form is necessary to understand and follow the authors and their train of thoughts. Therefore, although i do agree that the article rather long, but it consolidates for a better understanding of the presented material. I also read the suggestions documented in the final evaluation by editor. Under consideration of all the aspects i have reached to the conclusion that it can be published in British Journal of Applied Science & Technology.

Editor's Details:

Dr. Harshadrai M. Rawel

Institute of Nutritional Science, University of Potsdam, Germany
