PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments

You need to proof read the tenses in your report. I gave example in the reversed verion
Figure number should start from Figure 1, Figure 2, ...
Rework your references:
   You included et.al in some of the references
   Conference proceedings has no page number
   Books have no edition.... Check and follow say APER format
   Names in reference listing should follow same format
   Some author cited but not listed. (e.g (http://en.wikipedia.org/wiki/Value_network, 2015), Hilliard, (2007). . . . check others
Some components of the Figure have no lable especially figure 3.1, 3.2, 2.3, etc
In some of your citation in the body of the paper, I noticed some funny characters, e.g. the 1 on the (Durvasula 2006)1
Some words were concatenated in the body of the reversed version
How come you introduce tables of content and figure in the article
You need to include keywords
	Done reading.
	Figures are labelled
	Citations automatically inserted and managed by MS Office and using APA style.
	All references listed.
	Superscript 1 on citation removed
	Original article sent in for review was the incorrect paper prepared for submission so both tables were missing.
	Keywords included.
	
	Thanks and value your feedback
