

Reviewer's Comment:

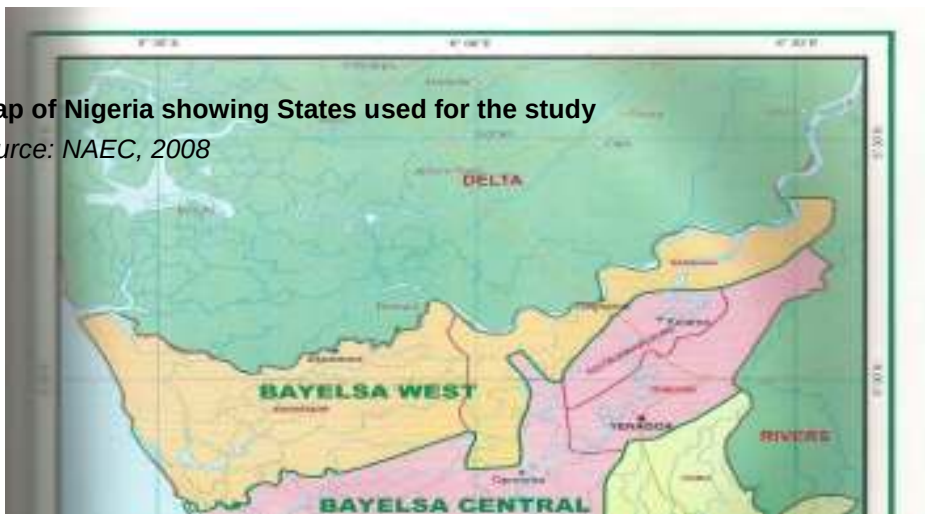

Still I can not see the map of the study area(please request him to add in the map) and to enlarge the discussion by using more recently published papers(2012-2015) on the topics from Other african countries.. Table-7: please define what you mean by agreed mean in the methods. if possible, use universally known terminologies. Discussion, please make a structured discussion in sections such as each point raised under a given specific objective is discussed.

Author's feedback:

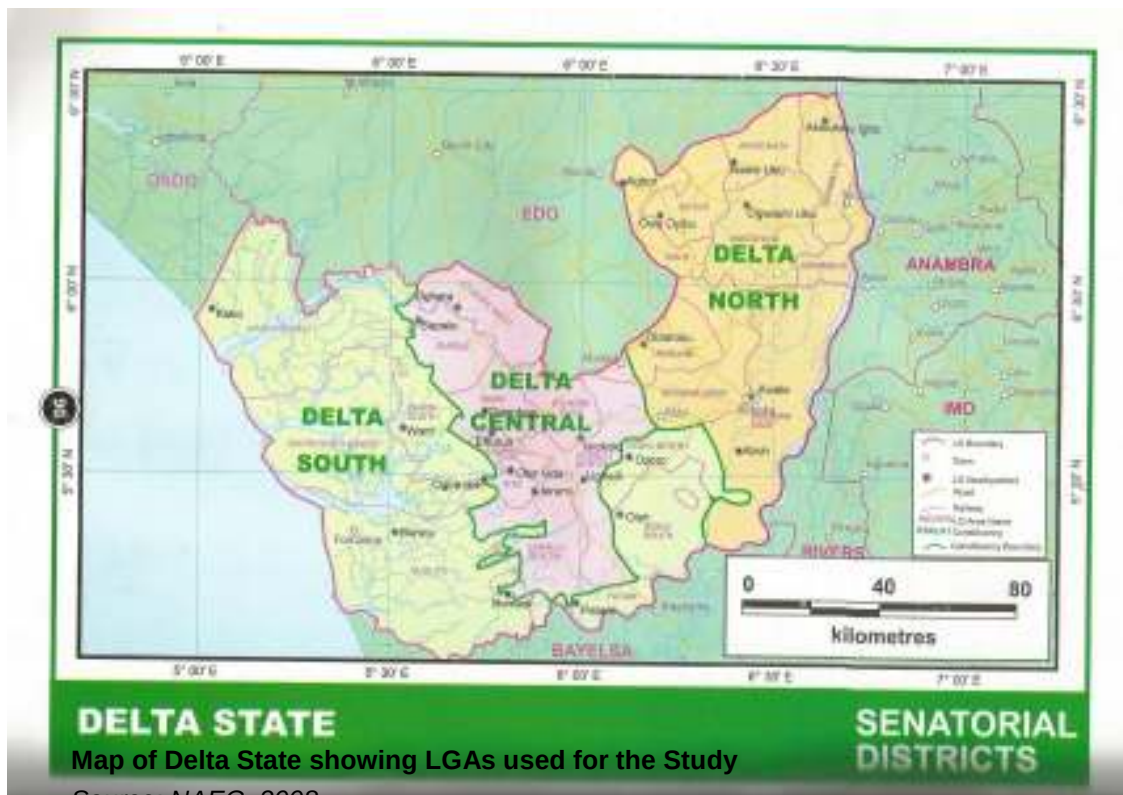

Map of Nigeria showing States used for the study

Source: NAEC, 2008

Map of Bayelsa State showing LGAs used for the Study

Source: NAEC, 2008

Map of Edo State showing LGAs used for the Study

Source: NAEC, 2008

NOTE- PARTICIPATION IN COMMUNITY BASED ORGANIZATION IN LINE WITH AGRICULTURAL PRODUCTION IS A NEW CONCEPT IN THE AFRICA WORLD, PARTICULARLY NIGERIA AND SO THERE IS NO MUCH LITERATURE TO DEPEND ON FOR THE NOW. HENCE IT IS SUGGESTED THAT WE REMAIN CONTENTED WITH WHAT WE HAVE FOR NOW, HOPING THAT WHEN THIS ARTICLE IS PUBLISHED IT WILL CONTRIBUTE TO THE ALREADY EXISTING KNOWLEDGE AND LITERATURE. THANKS

WITH REFERENCE TO TABLE 7 NOTE BELOW:

The weighted mean score of 2.50 was used to determine if their participation in the activity was high (i.e. if mean ≥ 2.50) or low (if mean < 2.50). The weighted mean was determined as follows: $[4 + 3 + 2 + 1] / 4 = 2.50$. Please note that agreed is the same as accepted, while mean represents average

Please note that each study objectives were well discussed from page 10 – 13. Please see to the article for reference purpose.
