

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_21960
Title of the Manuscript:	NORMALIZED INDEPENDENT COMPONENT ANALYSIS FOR FACE RECOGNITION
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	- All references are not available for consultation - The manuscript does not provide any distinguished discussion, it sounds like many papers already published - aspects of methods are presented in discussion section instead of appropriate methods section	-The references error has been corrected in the reviewed copy. - This study presents a combination of ICA (Independent Component Analysis) technique and ANN (Artificial Neural Network) to further process face image features and generate predictions. This forms final feature set to project test face images. The study went further to check how this approach improved on the performance vi- a-viz a conventional ICA based face recognition system. -This has been rewritten.
Minor REVISION comments	- Grammar and typos should be improved	- Paper has been double checked for typos.
Optional/General comments
