

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_22074
Title of the Manuscript:	The Effect of Gravity Loads on Seismic Lateral Displacements of R.C. Frames Using Different Damping Ratios
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>the review papers mentioned here are arbitrarily selected, there is no logical sequencing leading to the need for this study</p> <p>methodology is stated in general and the process of 'response spectrum analysis' is described in general. the load calculations and the specific process with respect to the selected building needs to be accommodated</p> <p>Repetitions of complete sentences under different sections need to be avoided</p> <p>The discussion is not sufficiently discussed and results need to be properly derived before concluding.</p>	<p>All papers reviewed herein investigating the role of gravity load, infill frames on seismic response of building as well as discussed by the present study.</p> <p>Revised & corrected</p> <p>Done</p>
<u>Minor</u> REVISION comments	Sentences should be either in past tense or present tense. the fluctuation of the tense is not justified at places	Revised & corrected
<u>Optional/General</u> comments
