SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	There is no adequate relevant literature review in this paper especially previous work on GA with neighbourhood search. The work focuses disproportionately on implementation while neglecting the other aspects of the paper. There is no strong background and methodology expositions. Which referencing style was used? The references are not properly done. Please follow the style standard order.	There are three references about GA with neighbourhood search. There are two new Figures (Fig.1 and 2) to complement the Mechanisms as implemented here. References have been rewritten following the standard form as in the author's guide line. Thanks for your comments
<u>Minor</u> REVISION comments	The keywords are not defined and poor paragraphing as well.	Grammar and style done. Many thanks for comments.
<u>Optional/General</u> comments
