

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_22389
Title of the Manuscript:	IMPLICATION OF CLIMATE CHANGE ON GROUNDWATER RESOURCES
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Only data for 30 years has been considered for the study which may not be sufficient enough to assess impact of climate change. For better assessment, the authors should have considered data for a larger period. Further, climate change is a complex process and there are many other variables which needs to be considered at local and regional level to assess the impact with a reasonable accuracy. It is difficult to correlated climate change with change in groundwater regime with such a simplistic approach.
