SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript titled “ Effect of fermentation on the proximate, mineral and antinutritional composition of slimy kola (<i>Cola verticillata</i>) husk and white shell ” is an original study. However, some major corrections are required. These points are listed below. The abstract does not fully reflect the content of the manuscript. Introduction is too long. Experimental procedure is not understood, exactly. Please explain more deeply. Results are too long and complex and also contain repetitive situations. Please write more clearly. Discussion is more complex and unclear. This part should be rewritten in more detail and scientific. The results of the study should be explicated in light of the available information and taking into consideration the causal link. The conclusion part should be rewritten to also highlight the contributions of the study results to science and should be revised to include the suggestions of the researchers.	
Minor REVISION comments		
Optional/General comments
