SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript is not scientifically reliable and poorly discusses the survey and detoxification data. Only 25% of the manuscript references were recently updated. The selection of added extracts is not based on any scientific background and the data revealed from figure 3 shows a variation of concentration falls within the uncertainty measurement for ELISA method of determination of AFM1. There is no impact to detoxify AFM1 in levels below the European maximum permitted limits.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
