

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2014_BJAST_15910
Title of the Manuscript:	A Novel Model for Removing the Mixture Noise and Blur of the Image
Type of the Article	Method Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors completely ignored my previous comments (besides English proofreading). The paper still demonstrates low technical quality: it is poorly organized and the lack of clarity is its distinctive feature.
