SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Great data collection techniques. The authors could add the methodology the evolution of methodological steps in time - periods of questionnaires and interviews applications, and other. Line 124: The reader can miss details leftovers categories of analysis. Results: The authors could add more dialogue with the literature on the results (the first item in the result was in line 308). It could also have more dialogue between the variables presented, how one can influence the other; based on studies. The recommendation was very important; but the conclusion could be more critical due to the studied scenario.	Thank you This has been reflected in the revised paper, although the discussion has been separated from the results
<u>Optional/General</u> comments	The authors uses good references, with actual and classics texts. Despite we have knowledge about the relationship between health and sanitations, data show us that we need to continue alerting the scientific community. Therefore, the focus of the important work.	We appreciate your contributions
