SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	-A map of the location and the position of the sampling points is necessary. -The authors are asked to do analysis of the neighborhood soil for comparison. -A recovery study must accompany the determination of sulfate and nitrate anions because of the complexity of the sample digests. Known amounts of the anions should have been added to the sample before sample preparation to account for any possible loss or interferences from other components.	1) Noted and modification made 2) Noted, though initially analysis of the neighborhood soil for comparison was made and reported 3) noted
<u>Minor</u> REVISION comments	The aim of the work must be clearly specified after the introduction.	4) MODIFICATION MADE
<u>Optional/General</u> comments
