

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_29811
Title of the Manuscript:	Fuzzy Based Breakdown Risk Analysis Of Engineering Facilities: A Case Study Of A Vegetable Oil Refinery
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The authors use Fuzzy logic which requires minimal data would readily bridge the gap in breakdown risk assessment of plants. The idea is good but if it should be made more imperative with more parameters and assumptions.	Fuzzy systems are evolving and evolutionary systems. Based on experience and availability of new facts, adjustments could be made to the system to reflect new realities.
