

SDI Review Form 1.6

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2014_BJAST_10869
Title of the Manuscript:	Microfossils and Paleoenvironment of the Limestone-Shale Sequences of Gboko Formation, Middle Benue Trough, Nigeria
Type of the Article	<u>Original Research Article</u>

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. Please re-write the 'Abstract' section, better abbreviate it to one paragraph, and mainly focusing on the new finding or novel ideas of this paper. It is a wrong style of this section. 2. It will be better to control the number of keywords to three to five.	
<u>Minor</u> REVISION comments	3.The 'Introduction' section does not clearly tell us the research background and former studies of this region. Thus, we suggest that the authors should seek more former studies or ideas about its paleoenvironment of the Gboko Formation in this region. 4.Although the outline of this paper is good, it would be better if some extra comparisons with former studies added. For example, the authors may change the '3. Results and Discussion' to '3. Data and Analysis' and '4. Discussion and Comparison'.	
<u>Optional/General</u> comments	5.Please read more relevant former papers to learn how to use their studies or ideas properly into this paper. 6.The writing skill in this paper needs to be improved. Please ask someone familiar with scientific paper writing to help you rewrite the parts of ABSTRACT and INTRODUCTION.
