

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_23683
Title of the Manuscript:	Probiotic Frozen Yoghurt Production Using Camel Milk (<i>Camelus dromedarius</i>) With Improved Functions By Guava (<i>Psidium guajava</i> L.) Fortification
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Most of academically disputable facts were removed or revised. Some problems still remain. Particular parts of the supplied material MIGHT be considered misleading or obsolete. Since BJAST is a popular journal among the professionals around the world, a remark that this research is mostly territory-specific and relies on specific methods, may be recommended. Currently the scope appears to be limited to partially obsolete resources (some are 10-15 years old), and local standards. In order to avoid potential issues, author is suggested to use international regulations and modern-day research data in his/her further works.
