

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_25686
Title of the Manuscript:	Silver nanoparticles as inhibition agent of cooling tower microorganisms
New Title	Silver nanoparticles as inhibition agents of cooling tower microorganisms
Type of Article:	Original research paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This paper study is an interesting contribution that fits with the required criteria for being published in British Journal of Applied Science & Technology. The novelty of this study is clearly defined. I have had a careful look at the authors' responses and at the modifications performed in the manuscript. The authors performed most of the necessary changes to improve their paper. Unfortunately they could not replace the TEM image by a more suitable one which is understandable as they do not have the necessary equipment. So, this should not be a criterion for the rejection of the paper. I am satisfied of the changes made, and in my opinion the paper is worth to be accepted for publication in BJAST. Here are some typos that should be corrected: - "posses" (line 44) should be replaced by "possesses". - "Dimished" (line 72) should be replaced by "decrease". - "los" (line 138) should be replaced by "loss".
