| <b><u>Compulsory</u></b> REVISION comments | <p><b>Good paper on the application of GIS to environmental monitoring and planning, however, there are some concerns pointed out on the body of the manuscript</b></p> <p>The author(s) did not justification for this work as the statement of research problem in the introduction section was subjectively presented and the real problem as it affects the location of study (Anambra East LGA) was not presented. It was too generalistic. Again so many of the sentences are hanging as they could not convey complete meaning.</p> <p>The author misspelt most of the names of the authors cited/referenced and lastly, the discussion of research result was not done as author(s) concentrated effort on giving recommendation instead. The author should have digitized and presented analysed flood maps for Anambra East only but in this case the study location is merely occupying the middle portion of the entire map.</p> <p><b>Please clarify the issue:</b><br/>Most of the claims made by author were not sourced especially when describing the geology and climatology of the study area.<br/>Most of the author(s) cited and referenced as single author are not true as in the case of our paper in 2013 (cited and referenced as Nkeki 2013).</p> | <p>THE CORRECTIONS HAS BEEN AFFECTED</p> <p>MISSELT WORDS/AUTHOURS NAME HAVE BEEN CORRECTED</p> <p>THE MAP HAS BEEN DIGITIZED FOR ANAMBER EAST ONLY</p> <p>SOURCES HAS BEEN DULY ACKNOWLEDGED</p> <p>CORRECTIONS HAS BEEN AFFECTED</p> |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                        |
| <b><u>Optional/General</u></b> comments    | My review comments are insert on the manuscript                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                        |
