

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

|                          |                                                                                                         |
|--------------------------|---------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">British Journal of Applied Science &amp; Technology</a>                                     |
| Manuscript Number:       | Ms_BJAST_30676                                                                                          |
| Title of the Manuscript: | New Efficient Machine Learning Algorithm to Solve Facility Location Selection Problem of Geoinformatics |
| Type of Article:         | Original Research Article                                                                               |

**PART 2:**

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Authors' response to final evaluator's comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ol style="list-style-type: none"><li>1. Some formulas and figures should be centred, like figure 3, figure4.</li><li>2. In the lines 63, it should be Table 1, not Table I, like lines 251.</li><li>3. The sequence of reference label was in chaos, it should be marked in accordance with the number order.</li><li>4. There are too much white space around figure 1, figure 2, figure 3 and figure 5.</li><li>5. Even "A problem of data mining in Ecommerce" is author's own paper, some statements should be modified to avoid high repetition rate.</li></ol> | <ol style="list-style-type: none"><li>1. Formulas and figures are centred throughout the manuscript.</li><li>2. In the line 63, Table I is replaced by Table 1.</li><li>3. References have been cited in the order of appearance throughout the body of the paper and highlighted in yellow.</li><li>4. Too much white space around figure 1, figure 2, figure 3, and figure 5 is removed.</li><li>5. As suggested, some statements have been modified to avoid high repetition rate, and users are referred to the author's previously published paper in the revised manuscript. Thank you for your valuable critiques and contributions.</li></ol> |
