| <b><u>Compulsory</u></b> REVISION comments | <ol style="list-style-type: none"> <li>1. In this paper, the diagrams are copied from online websites like Google Search Based Image Search. It is requested to the author to draw own diagram and then submit the paper.</li> <li>2. The paper contains just overview of various applications areas of RFID mixed with IoT. That is just basic information which can be crawled from Internet and tons of websites provide. What is the new explanation is not explained via use of examples and case studies. It is also recommended to explain the concept with some diagrams so that better visualization can come in the paper.</li> <li>3. Future scope is missing in this paper.</li> </ol> <p><b>Strong reasons:</b></p> <ol style="list-style-type: none"> <li>1. Concept is just basic and explanation is not proper in terms of live world case studies.</li> <li>2. Information which is being cited in this paper is as such available over tremendous websites.</li> </ol> | <p>1) Three figures are in the review paper. The first has been removed since the information in it is similar to what Table 1 contains. The remaining figures were drawn by the author.</p> <p>2) This is a review paper that aimed at giving readers a quick overview of the relationship and applications of RFID and IoT. Yet, the information documented in the paper though may be found on different journals. The essence of review paper is to give a summary and overview of what has been documented in different journals</p> <p>1) Many practical and real life applications were cited in the paper.</p> <p>2) Please revert to the response stated in 2) above</p> |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
