

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_31343
Title of the Manuscript:	The Delineation of Potential Groundwater Aquifers within Basement Complex in ABU Zaria, Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have made some corrections in the paper with 'bright green' colour. However, the author still need to correct these errors before the paper could be accepted for publication: - Arrange all the body citations serially and make sure it tallies with the reference list. - Line 50: Proper body citation must be given (NOT 'courtesy of GSN'). - One of the suggestions raised in the previous review has not been effected. The base map of ABU Zaria (sketch of some strategic places within the institution) showing the location points of VES 1 to VES 4 must be included in the manuscript. This would make the interpretation more visual and meaningful when reading the paper. This figure however, could be numbered as Fig. 1b in order not to disrupt the Fig. Numbering within the text. - Check the legends of these figures for corrections: Fig. 4 – weathered basement, Fig. 5 – Topsoil, Fig. 6 – Fractured basement, Fig. 7 – weathered basement.	Corrections in green effected - Body citations arranged serially and tallies with the reference list - Reference provided, which is now Reference [9] - Base map included showing VES 1 – 4, and numbered Fig.1b - Legends of Fig.4,5,6 and 7 all corrected
