SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The work is interesting but the manuscript will need extensive reworking to make it. On a scientific level there are the following things to be addressed: 1. The abstract section should be revised as cover the all of the paper content. The abstract should be improved. 2. The scientific idea and innovation of this research work is described clearly in the introduction section. 3. In addition, the authors should find new references and improve the results and discussion section. 4. Table 2 is not necessary. The data given in Table 2 should be given in a graphic. 5. The result section is very poor. Only $\square' = f(\text{frequency})$ and $\text{tg}\square = f(\text{frequency})$ graphics were given. The Cole-Cole plot should be given and according to Cole-Cole plot the authors should also decide the relaxation	We have agreed all the comments/suggestions made by this reviewer. All corrections have been effected and the Cole-Cole plot are also given for all temperatures.
