

**SDI Review Form 1.6**

|                          |                                                                                                          |
|--------------------------|----------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">British Journal of Applied Science &amp; Technology</a>                                      |
| Manuscript Number:       | Ms_BJAST_32611                                                                                           |
| Title of the Manuscript: | PEASANT FARMERS' ADAPTATION STRATEGIES TO COPING WITH CLIMATE CHANGE IN JIBIA NORTHWEST KATSINA, NIGERIA |
| Type of the Article      | Original Research Article                                                                                |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**PART 1: Review Comments**

|                                            | Reviewer's comment                                                                                                                                                                                                                                                                            | Author's comments (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                            |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <b>My recommendation for revision is the author should include similar studies carried out elsewhere in the world. He can mention if these adaptation measures have been done elsewhere and how successful they are. In a nutshell, he should compare and contrast his study with others.</b> | The scanty local literature available at my disposal has been included herein. I tried to avoid alien literatures of areas with differences in natural anthropogenic factors from the current study area. |
| <b><u>Minor</u></b> REVISION comments      | Minor revisions can be found within the manuscript.                                                                                                                                                                                                                                           | Noted and corrected                                                                                                                                                                                       |
| <b><u>Optional/General</u></b> comments    | <b>The paper is well done and presented. The work done is important especially for climate change scientists trying to find adaptation measures.</b>                                                                                                                                          | Appreciate the comments made                                                                                                                                                                              |
