

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_33248
Title of the Manuscript:	Evaluation and Mapping of the Noise Levels in Oil Mill Market and its Environs, Port Harcourt, Nigeria
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I compliment the authors for having dramatically improved their manuscript. I would now support publication. I am only reporting a few, very minor, corrections:	
In the abstract, where the authors said: ... with significant health effects on traders and the public. I recommend replacing with: ... with potential health effects on traders and the public.	Significant is replaced with potential as recommended
Throughout the text there are several "glued" words, see for instance in line 8, page 2: ...public health concern especially for merchantswho are engaged in...	This has been corrected
In Figures 2 to 7, I recommend using the line chart without the data markers. For instance, in the Figure 2: I recommend removing the green triangles (data markers) in the line chart of the FMEnv limit.	Data markers have been removed from line graph
Some parts of the text are in different fonts (such as Calibri instead of Times New Roman). See for instance in line 24, page 3: ...hours each day. Volume of vehicles q was calculated using the expression (Equation 1):	This has been corrected
