

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	Ms_BJAST_33408
Title of the Manuscript:	Brazil market outlook for photovoltaic solar energy: A Survey Study
Type of Article:	Review paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Where is the contribution in the paper? The information could be found on the internet without the necessity to collect it into a single paper. A research paper must contain at least a contribution proposed by the authors even if it is a survey.</p>	<p>The contributions are:</p> <p>Originality/value – This paper will contribute to the literature on PVs in Brazil and people interested in understanding Brazil's photovoltaic solar energy situation. This integration of scope is particularly new to the context of the Brazil industry. Similarly, this research will have implications for practice. The outlook presented helps people to understand the opportunities in Brazil, impediments and future perspectives of implementation adding knowledge to the discussion.</p> <p>The feedback saying that the reviewer doesn't think the article brings real contribution has not been mentioned in any of the previous reviews. We've made some necessary corrections and some suggestions; however, we had understood that these were suggestions and not mandatory changes. Some of the suggestions would change the scope and type of the article.</p> <p>We have chosen to conduct a review article in which we understand summarizes and organizes recent research results (collecting data from a broad collection of previous works and making conclusions from this survey) in a novel way which integrates understanding to work in the field. From this survey article people can get knowledge and perspective on the area and future trends in Brazil.</p>
