SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- Abstract has some orthographical mistakes (super index in cm, Celsius grades with capital letter) and do not include conclusions in it. - Introduction has several grammatical deficiencies. - Line 19-22: Check the sentences and the reference because is no possible consuming 7.5 g of animal protein per kilogram of body weight. - Line 53: describe "ruga" meaning in materials and methods or in introduction. Ruga is a very local word, therefore in difficult to understand. - Line 53: Biological replicates are not enough, therefore statistically no value. - In results are some sentences with discussion (lines 98,100) and there is no necessary to repeat the results of the tables. - Lines 159-161 and lines 165-167 are repeated. - Conclusion should be focused on the importance of milk production of Fulani herds on human health. - Check all references because almost have orthographical mistakes and some are cite with their short title.	

SDI Review Form 1.6

<u>Minor</u> REVISION comments	- Please check capital and small letter use in whole manuscript. - I consider important to discuss more about bacterial count because of human health and food security.	
<u>Optional/General</u> comments	- In my opinion, introduction and discussion should be focused on describe Fulani herds, because this kind on animal production in very interesting and milk is one important source of nutrient to Nigerian population.
