

**SDI Review Form 1.6**

|                          |                                                                                                                        |
|--------------------------|------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <b><u>British Journal of Applied Science &amp; Technology</u></b>                                                      |
| Manuscript Number:       | <b>Ms_BJAST_29503</b>                                                                                                  |
| Title of the Manuscript: | <b>Response Time Improvement on one Time Password (OTP) Technique to Prevent Replay Attack in a Radius Environment</b> |
| Type of the Article      | <b>Original Research Article</b>                                                                                       |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**PART 1: Review Comments**

|                                     | <b>Reviewer's comment</b>                                                                                                                                                                                                       | <b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compulsory</b> REVISION comments |                                                                                                                                                                                                                                 |                                                                                                                                                                                      |
| <b>Minor</b> REVISION comments      |                                                                                                                                                                                                                                 |                                                                                                                                                                                      |
| <b>Optional/General</b> comments    | The RADIUS protocol with vulnerability of replay attack and the three techniques to prevent the replay attack in a RADIUS environment with captive portal has been studied in detail and has been well established in the work. |                                                                                                                                                                                      |
