SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- line 156: cite another article, not Wikipedia - line 158-168: This part need more references (links for Java and Perl, explanation of the conclusions...). Maybe you can talk a little bit about Python in Bioinformatics (you refer to Galaxy and the code is written in Python). - Problem with the references (12 line 192 and just 8 in the references, no date for the 4...)	
<u>Minor</u> REVISION comments	- lines 97-98: maybe the authors can add the website addresses of these softwares. - lines 106-107: I think there is a problem between the numbers indicated here and in the reference part. Moreover, the <i>Saccharomyces ibid</i> is not numbered in the text. - line 131: Add FASTA before the translation and put the translation into brackets (to homogenise the writing of all softwares). - line 154: "to observe and anticipate" - The Table 1 is not called in the text - line 174: the sentence need to be rewrite - line 179: maybe you can add a point between "etc" and "the study"	
<u>Optional/General</u> comments
