SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The title seems to be wrong: It should be "Treatment of municipal wastewater by subsurface flow wetlands modified to rural communities in Mexico". Grammatical errors in abstract...Please recheck the language for Abstract section. The language again needs to be checked from line 68-87. I am surprised to see good English in few paragraphs in Introduction section followed by very poor English in Abstract and line 68-87. Further the sentences in line 70-75 needs to be bifurcated into two or three sentences. Overall I recommend full language check. Descriptions for figures are very poor. Justification of results needs to be improvised. Conclusion needs to be strengthened with the objective. The Objective has to be clearly stated in the introduction along with sub objective of the paper. Understanding the concept is difficult due to language. If the language is improvised a major task will be solved and then paper needs to be submitted and reviewed again.	
Minor REVISION comments		
Optional/General comments
