PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The authors were given the chance to improve their paper, but no improvements were found. The paper didn't contain any contribution and the authors didn't make any effort to modify the paper as per our comments. Therefore, in my opinion, I think it should be rejected unless they do major modifications and make a clear contribution. I leave the decision to other reviewers and editors.</p>
