PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors made some improvements in the paper, but it remains certain improvements such as: a) Clarifying the theoretical framework b) Expand the literature review c) Explain about questionnaire validity and its source d) Control the results with several variables e) Review the citations of the text and compare them to the references list	The theoretical framework of the paper has been improved upon and we believe that is well articulated. On the literature, we decided to summarize and articulate the relevant literatures as they pertain to the focus of the paper. We dropped the earlier idea of breaking down the years and summarized them. We have also improved on the citations and the reference. Thanks a lot for the comments they are very rich and we believe that they have helped in improving the paper
