SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Compulsory REVISION comments		
Minor REVISION comments	This is an interesting paper. It would be strengthened (in addition to editing the language) by concluding the literature review with one or more hypotheses which are then tested in the findings section (the analysis itself need not change). The author can observe whether the results are expected or not and what, therefore, is the contribution to knowledge provided by the paper. A line or two about limitations of the research would also help.	Thanks for criticise. We have added some lines to text about that.
Optional/General comments
