SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	In the introduction, please, provide a better definition of the Libyan Food Industry (LFI) trying to define, in particular, its consistency, peculiarities, specific needs (especially referred to the topic of the paper). Try to describe and quantify the real/practical benefits of the implementation of a TQEM on the just defined LFI (or, at least, in some of its specific applications/companies). Spend few more words for demonstrating the adequate representability of the sample (managers and employees from "only" 3 companies) respect to whole LFI. Doubts can be especially related to the used of participants with "oriented" opinions (in the meaning of "not- randomly" distributed). If not, explain how you took in count of this limitation inside your final considerations.	
<u>Optional/General</u> comments	Give a final check: few mistypings are present as, e.g., lines 557, 676 have to be empty; line 640 no comma.. line 486, 487 have to be deleted etc..
