PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	There are some minor mistakes with word choice and spelling and I am not convinced about the nature of the relationship between health and GDP per capita but otherwise this is a good paper.	The article was already rechecked for spelling errors. Additional supporting literatures were also cited to further support the link between maternal and child health to economic growth as shown in lines 48-65 of the revised paper.
