SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The paper looks good and there are some minor mistakes needed to be corrected for publication.	1. Changes have been made to the abstract but we are of the view that the abstract is just a summary of the research work and that all salient points are included in the abstract 2. With regards to the definitions included in our literature review, SME in different countries has its own definition. We therefore presented the worldwide definition and the Ghanaian definition. It should also be noted that the entrepreneurship nature of SME in Ghana is included in the introduction and the literature review part of the paper. We therefore deem that unnecessary to repeat it again. Also reviewing on business growth model is our next paper yet to be completed. We don't want to repeat ourselves. 3. Conceptual framework has been modified 4. Ghanaian perception has been included in the conclusion and recommendation
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
