SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The theoretical literature section needs to be revised. The study did not show how the Cobb Douglas function relates to debt and agriculture. The study needs to find theories that explain the relationship between debt and agricultural output/economic growth. There are a number of theories that explain the relationship between these two variables e.g the debt Laffer curve. The empirical literature section needs to be revised. In fact it needs to be restarted because the study did not identify even one single study that attempted to explain the relationship between debt and agriculture. All the studies listed in the empirical literature review section focused on the relationship between debt and economic growth. How about agriculture??	The theoretical literature has been revised. Your observation on the empirical literature is correct but we are constrained by lack of direct empirical literature on domestic debt and agriculture in Nigeria.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
