SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	There are a lot of grammatical errors which make the paper difficult to read and understand the issues. Rewrite the abstract. I suggest that the author (s) should not present each case study separately. All the case studies should be used to present the results and the discussions together under thematic areas. The manuscript should be written again in a different format to suit any standard scientific journal. The background information is not sufficient. It does not cover global issues and arguments concerning entrepreneurship and sustainable livelihood. Please try to report findings of works that are done regarding the topic under investigation. You should look at my published paper concerning mining and livelihood which I used the sustainable livelihood as a framework. Check the manuscript for more comments.	Grammatical errors have been removed to keep fluency in reading. Findings of work regarding the topic under investigation have been added as per suggestion. Authors have gone this paper.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Please get someone who is a native English speaker to proofread your article in order to avoid common grammatical errors and mistakes.	Article has been proofread.
