SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	I like this paper, it is short and contains lots of interesting findings. The methodology is well-described, statistical analysis is solid and the structure of the paper is good. Overall, information is well presented. Conclusions are based on data presented. I like the literature review; it refers to many recent publications on Ethiopia. You may consider also this World Bank publication: Making Finance Work for Africa - Patrick Honohan, Thorsten Beck – 2007. I believe it also talks about Ethiopia. There is scope for improving the English language. The paper would certainly benefit from some English professional editing.	I would like to thank the reviewers for giving us very constructive comments which will improve the quality of our paper. All the comments are well taken and revised. I have seen this article, but I am failed to pick out the point that may help us in our specific paper. For Sure the paper is interesting. I have done some editions in this regard.
<u>Optional/General</u> comments
