**PART 1: Review Comments**

|                                            | <b>Reviewer's comment</b>                                                                                                                                                                           | <b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <b>Suggest authors give some suggestions &amp; methods to drop corruption in China besides the analysis of Guanxi &amp; Corruption. Because solution is more important than analysis itself.</b>    | I have given some suggestions to counter on corruption according to the review comment.                                                                                                     |
| <b><u>Minor</u></b> REVISION comments      | Suggest authors reorganize the manuscript with mark part number like 1 Introduction (line 18), 2 Guanxi's function in corruption (line 66); 2.1...;2.2... etc. Thus the paper could be read easily. | Thank you for your comment. I changed the title of one section to achieve the intended effect.                                                                                              |
| <b><u>Optional/General</u></b> comments    | Reference should be given number and mark the relevant in the manuscript so as to let readers check and read easily.                                                                                | I have given the marking number.                                                                                                                                                            |
