SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comments (if agreed with reviewer, corrects the manuscript and highlight <i>that part in the manuscript</i> . It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- Objectives of the research should be very specifically given point wise basis. Accordingly hypotheses should be written against each objective. - In the line nos 103, 104 and 105, the demographic data analysis can be given completely. For e.g. 38% respondents belong to the age group of 45 years and older and 53.7% belongs to in the age group of 27-44 years. Total comes 91.7%. So, it will be more cleared if the author gives the details of the age group which belongs to the remaining percentage. Same is the case in line nos 114-115. Break up details of 100% can be given for the respondents falling in different working experience groups. - In Table no 1 under the heading of "Employment period at this job", the total percentage comes 99.8% when adding all the working experiences. It must be 100%.	Thank you for the comments. All revisions and corrections were made according to the comments and highlighted in yellow in the text.
<u>Minor</u> REVISION comments	- A sample one page questionnaire can be inserted at the end of the manuscript to add more value to your manuscript. - In line no 89, full form for SPSS is written as Statistical Program for Social Sciences. I think it should be Statistical Package for the Social Sciences. - In line no 253, $R^2=0,440$. It should be 0.440. Again, in Table 1 under heading "Position at Work", percentage for "Other" is given as 2, 2. It should be 2.2.	Thank you for the comments. All revisions and corrections were made according to the comments and highlighted in yellow in the text.

SDI Review Form 1.6

	• Abstract section is ok. Abstract section should be informative and completely self-explanatory, briefly present the topic, state the objectives & scope of the work, point out major findings, summarize the results and give the principal conclusion. • Literature Review can be given more of this study.	
<u>Optional/General</u> comments	• Overall, this is a good manuscript ..
