SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Authors present their review on the modern prospect of creating Grid-technologies for information economics in the World and Ukraine. They base their study on nanotechnology, Biotechnology, Information technology and Cognitive science (NBIC) technologies. Organization of the paper needs to be improved. Introduction is 1 page, methodology is 1/4 page, results and discussion section is 18.5 pages and conclusion is 1.5 pages. Since this paper is not an application paper, it is not reasonable to have results and discussion section. In my opinion, you don't need to use the term "results and discussion" in the header. You can remove and change heading numbers 3.1 and 3 to 3 and 4 respectively. 3.1 is too long, it needs to be reorganized. You can create additional chapter. Conclusion needs to be based on your reviews and studies. Here, it mostly sounds trivial. You can improve that section.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
