SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The Introduction is extremely poor. Originality aspects, the relevance of the topic as well as of the case study, the structure of the paper are completely missed. Section 2 should be rewritten in a more critical and academic way. The choice of the empirical strategy should be appropriately and effectively explained. Comparisons with previous studies and policy implications are absent. The editing is poor and there are some typos. The English needs a proof-reading by a native speaker. Recent studies should be added and discussed in the literature section: Magazzino, C., (2016), The relationship between real GDP, CO2 emissions and energy use in the GCC countries: a time-series approach, <i>Cogent Economics & Finance</i>, 4, 1, DOI: 10.1080/23322039.2016.1152729; Magazzino, C., (2015), Economic growth, CO2 emissions, and energy use in Israel, <i>The International Journal of Sustainable Development and World Ecology</i>, 22, 1, 89-97, DOI: 10.1080/13504509.2014.991365; Magazzino, C., (2014), A Panel VAR Approach of the Relationship Among Economic Growth, CO2 Emissions, and Energy Use in the ASEAN-6 Countries, <i>International Journal of Energy Economics and Policy</i>, 4, 4, 546-553.	
Minor REVISION comments		
Optional/General comments
