SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper deals with an interesting topic. It obtains clear results that can be easily applied. However, the whole paper showed a lack of care regarding references/edition/Figures/Tables: they are spread along the paper without following any noticeable rule. Sometimes the expression <i>et al.</i> is used in italics and sometimes is not; also the author of references is sometimes followed with a comma and sometimes is not. The same happens with figures and tables that appear split into two pages, or that show a column with the text centred while the one that is beside is aligned to one side (Table 1). This must be corrected before next review.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The paper can be easily improved if its edition is done precisely and following general academic standards. Once this is done, there are some additional improvements that have to be done regarding methodology and results/conclusion discussion.
