FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Still current title "ILLUSSIONAL EFFECTS OF FOREIGN DIRECT INVESTMENT ON ECONOMIES OF DEVELOPING COUNTRIES. THE CASE OF ZAMBIA" is not appropriate. I suggest to write it " The effect of foreign direct investment on economic development: The case of developing country Zambia" Most of the suggested points done by the author(s), however, the following studies if incorporated will certainly improve quality of the paper. - o Azam, M., Shahbaz, M., Kyophilavong, P. and Abbas, Q. (2016). External sources and economic growth-the role of foreign remittances: Evidence from Europe and Central Asia. <i>The Journal of Developing Areas</i>, 50(2), 367-387 - o Azam, M. and Ahmed, M. A. (2015). Role of human capital and foreign direct investment in promoting economic growth: evidence from Commonwealth of Independent States. <i>International Journal of Social Economics</i>, 42(2): 98-111. - o Muhammad Azam, (2015). The role of migrant workers remittances in fostering economic growth: The four Asian developing country's experiences. <i>International Journal of Social Economics</i>, 42(8): 690-705 - o Azam, M., and Gavrilă, L. (2015). Inward foreign capital flows and economic growth in African countries. <i>Journal of Applied Economic Sciences</i>, X-3 (33): 362-371	Thank you very much for your valuable contribution to this paper. We really appreciate. The suggested tittle seems very good but the authors suggested little modification to it as follows: 'THE EFFECTS OF FOREIGN DIRECT INVESTMENT ON ECONOMIC GROWTH OF DEVELOPING COUNTRIES: The case of Zambia' We are still open to your suggestion if you still think our slight modification is inappropriate. Thank you very much. A few ideas have been pitched from these references but it seems these papers are almost contradictory to our title so it could really help if you can actually point out which part we can use from the referred papers to enrich our paper because that is very important to us. We highly appreciate your contribution to this paper and we are still open to suggestions on this too. Thank you again.
