SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Totally survey paper. Authors haven't tried to make the paper novel by including figures, tabular analysis, comparison analysis to make the paper more readable . Authors need to include figures and perform Tabular comparison analysis. Need to use BU style of referencing	We agree that the comparative analysis presented in the form of tables would be more informative. At the same time, we wanted to show the results of Ukrainian modern developments in the field of supercomputers. However, we were limited by the format of a short scientific article in which, in our opinion, the related foreign advances should be presented as briefly as possible. Of course, we will take into account reviewer's comments during the preparation of subsequent scientific articles.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

As per the guideline of editorial office we follow VANCOUVER reference style for our paper.
