

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Economics, Management & Trade
Manuscript Number:	Ms_BJEMT_30613
Title of the Manuscript:	PROSPECTS FOR WORLDS&UKRAINE'SINFORMATION ECONOMY IN CREATING AND IMPROVING SUPERCOMPUTERS BASED OF NBIC-TECHNOLOGIES
Type of the Article	Short Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
No changes made as specified previously. (Totally survey paper. Authors haven't tried to make the paper novel by including figures, tabular analysis, comparison analysis to make the paper more readable . Authors need to include figures and perform Tabular comparison analysis. Need to use Vancouver style of referencing)	We believe that the format of a short scientific article to us, it is not advisable to stay on comparative analysis of programs of development of supercomputers in other countries. Moreover, in abbreviated form, this information is given in the article (but not in tabular form and narrative form). The aim of this article is to inform readers about the results of development of supercomputers in Ukraine.We believe that a detailed comparative analysis is needed in the full research paper, but not in short scientific review. Comparative analysis (in tabular and graphic form) should be performed in full-length scientific article. We are just a short scientific paper, which, in our opinion, does not require such a detailed study of international experience. We have issued our links, in accordance with the requirements of the journal. Of course, we will take into account reviewer's comments during the preparation of subsequent scientific articles.
