

Reviewer's Comment:

All of the revision belongs to research methodology chapter. Here is the revision:

1. Please explain more the reason for using RCA and spearman rank correlation.
2. Please explain the data collection process and how to get sample.

Author's Feedback:

Dear Sir, here are the explanations of your inquires;

1. The reasons for using RCA is explained from 163-168 and the spearman rank correlation's one explained from 178-192 sections. Please find the sections.
2. We used World Trade Organization (WTO) database to find the merchandise (textile and apparel) trade database for Bangladesh and China
<http://stat.wto.org/StatisticalProgram/WSDBStatProgramYear.aspx?Language=E>
UN COMTRADE database; <https://comtrade.un.org/>
Bangladesh Garment Manufacturers and Exporters Association (BGMEA) data;
<http://bgmea.com.bd/home/pages/TradeInformation>
ITC data: http://www.trademap.org/countrymap/Bilateral_TS.aspx to find the bilateral indicators
World Integrated Trade Solutions (WITS) database to find different indicators data;
<http://wits.worldbank.org/CountryProfile/en/Country/CHN/StartYear/2011/EndYear/2015/TradeFlow/Export/Partner/BGD/Indicator/XPRT-PRTNR-SHR>

We had to collect data from the mentioned sources and compiled the data to get the exact figures and analysis.

Thank you so much for your valuable comments and insights for our paper.
