PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The current status of the manuscript is better than before but it still needs revision. - The authors displayed Tables 1, 5, 6 in the text, but Tables 2,3,4,7 in the appendix part. This will be confusing for the readers of this manuscript. - In all the figures displayed by the authors, the titles of the x- and y-axes are still missing. It is not right to discuss any figure with graphical representation without labelling the x- and y-axes. - The figure legends should include more information about the figures.	*As suggested by the reviewers, tables 2, 3, 4 and 7 have properly returned to the normal place for easy analysis of the reviewer and the readers of the manuscript. *All the figures displayed in the study have been reflected with X- and Y-axes. *Noted and corrected with figures legend.
