New Title:	WOMEN'S PERSPECTIVE ON ORGANIZATION AND THE ALTERNATIVE MEANS OF INCOME IN AGRICULTURE IN THRACE REGION TURKEY
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
- The Author should present the data sources (official databases, questionnaires, etc.): - What are Agricultural Farming Registration Systems? It should be supported with the http address, date of access and name of institution providing the data. The Author should also inform about the year of the publication of the presented data, etc. - There are primary data presented in lines 113-116 without indication of the year of the publication. - There is no explanation to which period Research results refer. - The logit model is presented. However, the information about the 0-1 criterion must be implemented (what was an initial proportion of 0 and 1 in a sample). - I do not agree with the Author that the obtained results and the discussion section were rewritten in detail. - The Author should reveal the data sources: - In <u>table 1</u> and in <u>table 2</u> – it may be enough to put: Source: own preparations. Or Source: own calculations. Or Source: own work. - Figure 1 (incorrectly labelled by the Author as a table) does not include the data source, although it contains some numbers.
