SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	- The manuscript should contain the results of some unit root tests performed the data for its findings may lose their pertinence if the data used are not stationary. - The manuscript needs to be edited for it still contains some grammatical blunders. - The manuscript is too lengthy and should be reduced to reasonable proportions (around 6 000 words).	
<u>Minor</u> REVISION comments	- The abstract of the study should be improved upon; it is lengthy. Author(s) should focus on the aim, the methodology, and the results of the study. - There are some strong assumptions (e.g. "It is assumed that global variables affect all domestic variables contemporaneously." The other ones have been highlighted) made in the identification of the SVAR model.	
<u>Optional/General</u> comments	This is an interesting topic but the study needs to be structured/presented differently.
