SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	❖ JEL code was omitted. ❖ The background of the study/introduction is not robust enough as it fails to capture the current state of Nigeria gas market before positing its potential. ❖ Author is advise to detach literature review from the introduction of the study ❖ The literature review should be boosted to further incorporate related study of the subject in Nigeria and if there is Non, this should be stated in the work as gap the literature intend to fill. ❖ Since the interest of this research was the magnitude of Reserves Growth and the implications for Gas availability for the emerging Gas Business as envisaged in the Nigeria Gas Master Plan. Hence the Nigeria Gas Master Plan should be mention/discussed in the introduction/Literature review. ❖ Constraint to the development of Nigeria Gas Market will be of interest to the policy markers. ❖ Recommendation of the study was not clearly stated.	
<u>Minor</u> REVISION comments	The research topic is contemporary but literature deficient. This should be address by the author. No literature was review from the research country.	
<u>Optional/General</u> comments	The salient issues itemized above are critically addressed.
